Software Requirement-

1. Eclipse IDE for Java EE Developers

2. Postman API

3. MySQL Workbench 8.0.25

4. Java SE Development Kit 11

Production Dependencies- (Maven Latest version)

1. Spring Data JPA

2. Spring Boot

3. MySQL-connector-java

Steps-

1. Install all the software's then import the FastPay project directory in Eclipse EE (it automatically installs all the dependencies using network connection).

2. Change the log.txt file path in logwriter.java then Run the project as server.

3. Open Postman API then import API collection if any issue in running API call then refer the API documentation.
